BASSANO, ALTA., WEDNESDAY, JANUARY 28, 1914

No. 37

## THE BASSANO DISTRICT TO GET \$4,000,000

New Appropriation By C. P. R. for Natural Resources Department Approximately \$4,000,000—Early Spring Will See Much Activity—One Hundred Thirty Eight Ready-Made Farms Ready for Occupancy.

Through the announcement by the C. P. R. of its program of expenditures in the irrigation belt during the present year, approximately \$3,000,000 will be expended in Bassano and vicinity, beginning as soon as weather conditions permit.

At a recent meeting in Montreal it was decided to appropriate approximately \$4,000,000 for the natural resources department. This expenditure will embrace the preparing of 138 ready-made farms for immediate settlement and for improvements upon 400 farms under the company's scheme of loans to settlers; also providing live stock to settlers on C. P. R. lands and for opening C. P. R. demonstration farms.

The bulk of this expenditure will be applied to the irrigation system around Bassano, including additions to the storage system at the big dam on the Bow river. It is estimated that this latter expenditure will approximate \$3,000,000.

Estimating the average family at five, these 520 farms will mean an additional productive population for the Bassano district of 2,600

with an average capital of \$1,500 per farm, or a total wealth of \$795,000.

This increased rural population coupled with the great volume of money to be expended by the C. P. R. will turn into the channels of trade in Bassano a steady stream of wealth through the entire summer, while future development guarantees one of the most prosperous eras in the history of the province.

Being the natural supply and distributing point for the western section of the irrigation district Bassano is destined to enjoy the largest volume of trade in its history.

More than 2,000,000 acres are embraced in the C. P. R. project. Being the largest individual irrigation undertaking on the American continent. Already some \$13,000,000 has been expended in laying out the system and many more millions will be expended within the next few years.

This announcement of the C. P. R. should have a marked stimulus upon every line of business and industry in an era of prosperity that promises to eclipse all previous records.

## BOARD OF HEALTH INSPECTS DAIRY

Replies to Article Appearing in Last Week's Mail As to Conditions Prevailing

The following letter issued by the Bassano Board of Health, is self-explanatory. It shows that the board is looking after its duties, and is to be commended for its diligence. The letter is not in a position to pass any judgment on the matter, but hopes in a few days to pay a visit to Mr. Peniston's dairy.

Bassano, Alberta  
In reply to the letter from the White Dairy in the Bassano Mail, the Board of Health beg to report that:  
The executive officer of the Board of Health has examined the White Dairy and finds that the stable is sound, and is kept reasonably clean. That the cows look clean and well kept. That there seems an abundance of water for all purposes.

He finds however that the milk house does not comply with the Provincial regulations as the milk is cooled and stored in the same room where the feed and milking utensils are washed.

He wanted the cleaning of the utensils found that the operator was not saving of hot water and that they were not properly sterilized by being washed in hot water, and that after washing he could still notice a sour smell.

That the man who does the delivery has small boots in a proved fact, as one of the members of the Board saw him carry a pail full of milk into a place.

He wanted the cleaning of the utensils found that the operator was not saving of hot water and that they were not properly sterilized by being washed in hot water, and that after washing he could still notice a sour smell.

The citizens of Bassano may rest assured that the Board of Health will always try to look after the health of the community.

By Order of the Board of Health.

## PLenty of Work Will be Available

Calgary, Jan. 27.—The indications are that during the coming spring and summer there will be an abundance of work available for the unemployed.

Some of the principal jobs to be opened up will be the construction of a new office, work on which is to commence about the end of next month; the terminal elevator in Calgary; the government station in Alberta; the Grand Trunk Pacific railway station at the bank of the river, and the new station at the bank of the river.

It is also a strong possibility that the Calgary university may be built this summer, as well as a great many private buildings and houses. There will also be a new R. N. W. M. P. barracks for the government decided to locate at the police line to Calgary, and it is quite possible that the C. P. R. is in the process of constructing the over-land bridge across the track at Centre street, and a new station facing down Centre street, giving access from the south side of the city.

If all this work is undertaken, and there is no question that a good deal of it will be, it will mean that a large amount of money will be distributed and spent in Calgary.

If the next few weeks can be tidied up in looking through the unemployed problem will not be either the city of Calgary very much longer.

Ernest R. Muir spent Sunday in Calgary.

J. L. Torgun and wife spent Wednesday in Calgary.

H. B. Fowler, of Calgary, spent Wednesday in town.

C. P. Fisher spent Wednesday in Calgary on business.

Miss E. H. Rogers spent Saturday and Sunday in Calgary visiting her family.

Mr. and Mrs. Joe Siles and Mr. Siles' mother, visited friends in Calgary for a few days last week.

Miss Edna Muir, of Medicine Hat, spent a few days of last week in Bassano as the guest of her brother, Ernest R. Muir.

Rev. Mr. Hamilton, of Toronto, was in the city this week. Rev. Hamilton is secretary of the laymen's mission movement of the Presbyterian church and his business here was in that connection.

Charles Linck, representing the Calgary News-Tribune, was in Bassano Wednesday looking over the field with a view to giving the town a weekly paper. He returned to Calgary Wednesday night but will return in a few days.

## IRIGATION FARMERS STILL DEFIAIT

Mexican President Refuses To Talk of Giving Up—No Money

Mexico City, Jan. 28.—President Huerta betrays no sign of yielding, although he is cognizant of the increase in the strength of his enemies intriguing with the capital, and those in the field, is handicapped by inability to procure money.

Personal and political friends and the highest officials of the Catholic church in Mexico, who have been endeavoring by methods for the most part indirectly to bring about this elimination, are seemingly convinced tonight that they have failed.

General Huerta talks optimistically of the end, despite the size of his army, which he estimates as considerably more than 100,000 and appears to believe that in spite of all obstacles and reverses he will be able to eliminate Huerta within three months. If it is conceded that ex-Minister Flores Magón has failed in his mission to Mr. Huerta, the latter's position in the United States will be no longer a proposition short of the unconditional elimination of Huerta.

Some, however, President Huerta, attempt to dispute the fact that the Mexican treasury is practically empty, to suggest the government payoffs are being liquidated with reasonable promptness, but it is no secret that the diplomatic representatives and consuls abroad in many cases have not been paid for weeks and that the troops out of the capital can receive their pay long after it is due. In some cases these funds are derived from local sources, sometimes they are from forced loans levied on the inhabitants, where the troops happen to be stationed.

Extraordinary taxes have been levied in the capital, as well as outside points, but it is not clear that these are so much to be feared that they will cause trouble from the people.

## DEEP WATERWAY FROM MONTREAL TO JOLUIT

Canada and United States to Consider Project of Jointly Building a Deep Waterway From Montreal to Head of Great Lakes—Result of Recent Conference in Washington, D. C.—Negotiations to Begin Through International Joint Commission

Washington, D. C., Jan. 26.—A deep waterway from Montreal to the head of the lakes, built jointly by the government of the Dominion and the United States, is the project which will soon have the attention of the authorities of the two nations.

Negotiations will shortly be begun through the international joint commission which has jurisdiction over the boundary waters of the two countries.

The discussion instituted in the result of the recent conference in Washington, in which Secretary Bryan, Chairman James A. Tawney of the American section of the international commission and Senator E. Townsend, of Michigan, participated. It was arranged that the matter should be taken up first with the Canadian government through the commission. Chairman Tawney will confer soon with T. Chase Casgrain, K. C., chairman of the Canadian section.

The project for an ocean waterway from the head of navigation on Lake Superior to the Atlantic has been agitated for many years. It was considered seriously when President Taft entered into negotiations with Canada.

Several routes have been proposed for the waterway, the cost of which is estimated from \$100,000,000 to \$200,000,000, but the one most favored in the United States provides for the utilization of all the lakes and the St. Lawrence river.

This route, it is contended, would not require a great deal of leveling of the waters of the great lakes, while it is held a considerable change in the latter would result if any of the other proposed routes were adopted.

Senator Townsend, of Michigan, is one of the most ardent advocates of the project. He said recently: "It does not require an economist nor an expert trader to see that the economy which would result from the stupendous industry of the middle west of the United States and Canada if the burden of the shipment were removed, and cargo could be loaded at lake ports and unloaded at the Atlantic destination."

"This benefit would be increased by the similar advantages resulting to inland freight rates, and to the Atlantic coast and from foreign ports, but these benefits coming directly from the actual movement of goods, they will not be the only ones enjoyed by industry."

"Such a waterway would produce the result which has followed the creation of the St. Lawrence canal, namely, a great reduction of rail facilities from all points on even remotely competitive lines."

Senator Townsend recognizes three obstacles to the realization of this project. The first is the cost of the project. The second is the question of the right of the United States to the waterway. The third is the question of the right of the United States to the waterway.

## PRESIDENT WILSON AFTER COMBINES

Gale, Snow and Rain, Play Havoc in Oregon State—Houses Unroofed

Seattle, Wash., Jan. 27.—A severe storm swept over the Pacific northwest Monday, snow and rain being common, and high winds, which at some places attained a velocity of 6 miles an hour. The storm on Puget sound was the most severe since the close of the winter of 1913.

The wind blew 70 miles an hour at Cape Flattery. A portion of Eugene, Oregon, was flooded Monday by the overflow of the Willamette river.

## Subscription Cut From \$1.50 to 75c

On the inside will be found a full page announcement of the News' cut in subscription price for a limited time. This plan has been adopted for the purpose of increasing our already large circulation, by placing the price within the reach of everyone. It is the aim of the publishers to make The News the leading paper of this section of Alberta, not only as a news medium, but as an advertising medium as well. We propose to be able to give our subscribers the largest—sworn circulation of any newspaper in this section and are now having been a campaign for subscriptions that will be kept up until our efforts are crowned with success.

### BURIAL WITHOUT CEREMONY

Two more tombstones were erected in the Conservative cemetery on the 15th inst., when Parliament assembled for the third session of the Borden government. Where formerly the monument of the tariff commission bill stood in lonely condemnation of the government's past there are now three cenotaphs, commemorating the Borden Emergency Naval Aid Bill, and the Highways Aid Bill, both of which have been introduced without even the grace of a funeral ceremony having been held. Their obsequies came none too soon, for the Emergency was still-born on December 5th, 1912, and the Highways Aid Bill was killed at the close of last session when the government abandoned it rather than adopt the Senate amendments designed to bring it into accord with the Canadian constitution and provincial rights over highways.

Last year's Speech from the Throne was regarded as barren. This year's Speech might be regarded as a negation. The Speech which was given to His Royal Highness conveyed sympathetic references to the Duchess of Cornwall's illness and his own absence in England. It informed the people that there had been an increase in trade and immigration; that there had been a good harvest in the west and that the railways were running so well that they had been able to take care of the crop. Fleeting mention was made of the financial stringency, with the consoling proviso that it was attacking the whole world, so that of course Canada must get its full share.

No mention was made of the Senate, whose reference of the Naval Aid Bill to the people and amendments of the Highways Aid Bill had caused the Government so much disappointment. It is improbable that this neglect was caused by courtesy owing to the fact that the Speech was delivered in the Red Chamber. In fact the Government in omitting any reference to the Upper Chamber tacitly admitted that the Senate, by refusing these abandoned measures, had performed its proper functions in conserving the interests of the people. Further assurance to this effect, although not in consonance with Mr. Borden's election promises, was given in the announcement that the government intended to introduce a bill by which it could give the four western provinces two more Senators apiece, in the hope before long of aiding the Grim Reaper in effacing the present Liberal majority.

The only concrete legislation promised was the long deferred Road-building Bill, which was merely mentioned, and bills relating to the Civil Service and to Trust and Loan Companies.

Beyond this the main items of the Speech were congratulatory paragraphs regarding the completion of the National Transcontinental Railway, which was so bitterly opposed by the Conservatives; the progress of the Hudson Bay Railway, which was started by the late Liberal government and has been botched by the present administration; the development of Canadian ports, following out the program initiated by the Hon. J. Israel Tarte and elaborated under the Hon. Mr. Brodeur, and a felicitation of itself by the government on the Agricultural Instruction Aid Act, which was founded on the advice of the Technical Education Commission, appointed under the late Liberal government.

Almost at the last came the most important item from the government point of view—an announcement that the estimates would be promptly brought down, so that the Ministers could have plenty of money with which to carry on their extravaganzas. With unnecessary irony it was stated that the estimates "have been prepared with due regard to the necessary development of the resources of the Dominion coupled with careful attention to economical administration." If the latter provision is rigidly adhered to it will be a great surprise and disappointment to the Hon. Messrs. Rogers, Hughes, and Reid, et al.

The tariff, as was expected, was studiously avoided. There was no hint that the high cost of living needed any attention; no suggestion that the real interests of the people were being considered. The whole program for the coming session of Parliament, scant as it is, has apparently been designed to forget the mistakes of last session and fix things up so as to help the government itself for the present. As to the people and their requirements they were treated with a fine old Tory contempt.

This, however, merely outlines the Borden government's official attitude. When the opposition denies its program it will probably be found that Parliament is forced to undertake legislation more in consonance with the needs of Canada, just as was the case last session and the session before.

### STEADY DEVELOPMENT

The development of industrial enterprise in the Canadian West goes on with much steadiness. Last year, according to statistics compiled by the Industrial Branch, C.P.R. Department of Natural Resources, there were 1,000 retail businesses, 118 manufacturing concerns and 47 wholesale houses established at points on that railway in Western Canada. To take one centre by way of a practical example, in 1913 there were added to the industrial development of Medicine Hat ten

separate and distinct factories. All these have been completed and are turning out manufactured goods. The amount now invested in factories in Medicine Hat exceeds \$2,000,000, and there are other factories under construction at present, the value of which is in the neighborhood of \$5,000,000.

This thriving Alberta town is only one of many examples of a similar kind. From Fort William and Port Arthur, via Winnipeg, right through to the Pacific coast, the march of industrial development is proceeding unintermittently. In addition to Eastern Canadian houses opening up in the west, and local capitalists beginning operations there also, old-world and United States firms are finding it advisable to get in on the ground floor of western industrial development. All this interest in the vast country west of the Great Lakes will result in increased population, greater productivity and a more general all-round circulation of money every year. With agriculture being fostered and developed year by year in ever increasing measure and industrial production making steady headway, the future of the Canadian West is well assured. As the industrial population of the country increases, agriculturists will find it to their advantage to adapt their methods of farming to meet the growing requirements of the dwellers in the cities and towns of the west. The more the urban population increases, the better it will be not only for the agriculturists, but for all classes of retail traders in the community. Both these conditions will tend towards a more regular and constant circulation of money than has hitherto been the case.

### THE MOVING PICTURES

At a recent meeting of the Local Council of Women in this city the report of the committee appointed to keep careful supervision over the moving picture theatres in the city reported that on no single occasion had they found an exhibition which overstepped the bounds of decency. That is very creditable. It is not surprising, for the moving pictures are now managed in a very excellent way, and indecency is really not very good business in theatrical affairs.

The same committee declared that at times some of the pictures were silly and stupid. That is possibly correct, but that is frequently a matter of opinion. What may seem senseless and foolish to some may seem very funny to others.

Many people cannot see the humor in the grotesque pictures published in the Sunday supplements and in other newspaper editions. But other people do, and there is a demand for them. Nothing in moving pictures is quite so silly as the Sunday supplements.

The moving pictures are still in their infancy. They are developing rapidly. As time goes on the improvements are sure to continue. The moving pictures reach a much larger number of people than any other form of publicity except the press. There are great possibilities in the moving pictures.—Morning Albertan.

The weather man must be on a strike, or something is seriously wrong.

And now it seems that Pelkey's chances for the heavyweight championship have about petered out.

Bassano will welcome the spring season, as it means that a great many new settlers will be added to our ranks.

In the death of the late Lord Strathcona Canada lost a citizen of whom she might well feel proud. His loss will be keenly felt by the nation.

The Hon. C. R. Mitchell was a brief visitor in Bassano Saturday afternoon. He is a very busy man and is arranging for a trip to England early in February.

Canada and the United States will consider a proposition of deep waterways from Montreal to Duluth, Minn. A scheme of this character would revolutionize traffic on the North American continent.

The confession of Constable Reid in the Krafchenko case reveals an appalling state of affairs. The public is to be congratulated upon the recapture of this man Krafchenko, who is cunning and very resourceful.

The Calgary Liberal Association, notwithstanding the cold weather, had a rousing meeting last Saturday night in their club rooms. It seems that 30 below zero weather has little or no effect upon this band of patriots.

A large proportion of the duels in France end without bloodshed. When the offence is not very serious it is agreed beforehand that the words of command shall be given so rapidly that the duelists will not have time to take good aim. Sometimes three shots are exchanged without a hit, and then the seconds step in and—"honor is satisfied." At the word "Fire" the pistol is raised instantly, and it must be discharged not later than the word "three," so the speed with which these words are given regulates the time in which it is possible to take aim. Therefore the speed with which they are spoken is agreed upon beforehand, this depending upon the seriousness of the duel. The words are timed with a metronome. If the encounter be very serious this is set at the slowest speed, 80 beats a minute, which gives time for taking accurate aim. A speed of 120 beats a minute allows no time for aiming, and, therefore, is used when the seconds consider the duel should be made as little dangerous as possible.

## Get Your Canadian Home From the Canadian Pacific

Wonderfully fertile land is offered for sale by the Canadian Pacific Railway Company at prices ranging from \$11 to \$50 per acre. There is no better agricultural land than this virgin Canadian soil. It is unsurpassed for all forms of agriculture, including grain-growing, stock raising, dairying, poultry culture, vegetable growing, and general mixed farming. The lands are convenient to railways and markets, and are located in a country of low taxation and delightful climate.

### TWENTY YEARS TO PAY

Under the Company's new policy no land is sold to speculators, but only to those who will occupy and improve it. The terms of sale are now one-twentieth cash and the balance spread over twenty years, with interest at six per cent per annum.

### ASSISTANCE TO FARMERS

Under certain conditions the Company will advance a loan of \$2000 to new settlers to be used in erecting a house and barn, fencing, the land and sinking a well. This loan is repayable on the same terms as the purchase price.

For illustrated literature, maps and full particulars apply to

Canadian Pacific Railway, Calgary, Alberta.

# This Beautiful Hair

Is like what you want  
your hair to be—

Lustrous, bright and  
glossy; soft, silky  
and wavy.

To have beautiful  
hair like this, use

## HARMONY HAIR BEAUTIFIER

It's just what the name implies—just to make the hair glossy, and lustrous, and more beautiful—just to make it easier to dress, and more natural to fall easily and gracefully into the very lines and folds of the culture, just to give that delightful fresh and cool effect, and leave a lingering, delicate, elusive perfume.

Will not change or darken the color of the hair. Contains no oil; therefore, cannot leave the hair sticky or stringy.

Very pleasant to use, very easy to apply—simply sprinkle a little on your hair each time before brushing it.

To thoroughly clean your hair and scalp, use

## Harmony Shampoo

A liquid shampoo to keep the hair clean, soft, smooth and beautiful. It gives an instantaneous rich, foaming lather, penetrating to every part of the hair and scalp. It is washed off just as quickly, the entire operation taking only a few moments.

It leaves no lumps or stickiness.

—Just a refreshing sense of cool, sweet cleanliness.

Just a dainty, pleasant and clean fragrance.

Both in odd-shaped ornamental bottles, with sprinkler tops.

Harmony Hair Beautifier, \$1.00; Harmony Shampoo, 50c.

Both guaranteed to please you, or your money back.

Sold only by the agents, the 2000 Retail Stores—The World's Greatest Drug Stores—and in the 1000 Drug Stores, where all the celebrated HARMONY, VIOLET and SOLUBLE BEAUTY Products are sold.

Sold in this community only at

STILES, the Druggist  
Bassano, Alberta

## When Mozart Was a Boy

**A Boy**

**L**AMOST every family in the neighborhood has shown signs of the genius within the boy's genius when he was young, but no one at an earlier age than Moseart. He was only 5 when he first began to take an interest in music. One day his father found him picking out the harmonious notes in the octave on the piano. It was unusual for a baby of that age to have such a sensitive ear.

His father was also a good musician, and Moseart heard a great deal of music from his father's friends. These friends would come to the house to practice, and little Moseart would listen to them and to his father. But on this particular occasion it happened almost by accident, as a well-known violinist of that day, brought some music he had composed

notes coming from the corner of the little bedroom. And there was little Moseart, crying his little heart out. He had just been asked to play with them. He was not a very strong violinist, but said he had been told, "Not my child," the father said, "You have never had a lesson."

"I don't need lessons, I can play myself," he shouted. The friends laughed, and surrounded the father to let Moseart try. So Moseart tried his forte, and

and

[illegible]

beautiful princess  
in all the world, to  
marry that penni-  
less, low-born creature!" cried the king  
in a passion. "Naturally, Nibbles, one would  
think that you had no pride, no appre-  
ciation of what a mighty personage you

[illegible]

to check me in my night. If you would have your daughter wed one mightier than I, let her wed the Wall.

So the patient parents, not to be daunted, wended their way to the Wall, told their story and made their offer.

[illegible]

## PREVAILING CONDITIONS ARE NOT VERY ROSY

\* For almost the first time since Ontario was established in 1827 by the Flanders tariff and the wise administration of the Laurier government, Canada is now suffering owing to a serious business crisis with consequent lack of employment. In Toronto it is stated that a conservative estimate there are 15,000 men walking the city streets in search of employment, while the number is being considerably increased, so that there are more than 20,000 men having lost their jobs between December 20th and the New Year. So serious has the situation become that the city council has had to take cognizance of it and civic works are being arranged in the hope of furnishing employment for these men. There is a Honoris Jure in the fact that Tony Toronto is one of the worst sufferers from Tony misgovernment.

At Winnipeg it is reported that between 5,000 and 6,000 men are out of work, while their number is being constantly increased. At Regina, Saskatchewan, the police have become so acute that the unemployed have threatened violence in the hope of attracting attention to their misery. The police find it so difficult to cope with the situation that preparations were made to bring out the militia and put the city under martial law in case of emergency. In Montreal every charitable institution is taxed beyond its limits, and at several points "bread lines" have been established with much effect that men whose only misfortune was that they had no work to do gathered at midnight to wait hours in the cold for their dose of bread and coffee.

From every part of Canada come reports of hard times, retrenchment and lack of employment. It is impossible now to contrast these conditions with those which prevailed during the fifteen years of Liberal administration and during the first year of the present Government.

It is impossible to argue that the methods of the present extravagant opportunistic government have nothing to do with this state of affairs, so disastrous to a young and prosperous country such as Canada. During the Laurier administration national expenditures were kept down within reasonable limits while proper care was taken to spend whatever money was necessary on national development and the tariff was judiciously revised in order to meet conditions as they arose. Prosperity was the natural result.

Under two years of Conservative government the offices of national property management during fifteen years of some Liberal administration have been crumpled, taxes have been increased, expenditures have doubled and more than doubled. Extravagance and corruption have been in evidence on every hand and now the inevitable result has followed. Canada's credit abroad has suffered, her trade has fallen off, her debt has increased, the national income is falling and the financial stringency is such as will make the present winter unendurable to many as the worst they have had to endure since 1890. Providence helps those who help themselves. Under Liberal administration Canada was really governed, and the statements who supported Sir Wilfrid Laurier moulded their actions to meet situations as they arose. Under the coalition group of opportunists behind Mr. Borden the reverse has been the case and even now that parliament is again assembling, the government is so tightly in the grip of the highly protected interests that not the slightest move is indicated towards the lowering of the tariff on food or any serious effort to cope with the high cost of living and the lack of employment.

## A LOVELY FACE— BUT UGLY HAIR

How often you see an otherwise lovely face spoiled by homely hair—a face that would be most charmingly beautiful if she only had prettier hair. What a pity!—and how foolish! Because that ugly hair, stringy, dull, lifeless-looking though it may be, can be made as glossy, soft, silky and beautiful as the hair could desire if only taken proper care of.

Harmony Hair Beautifier is just what it is named—a hair beautifier. It is not a hair dye or hair oil—it is just a dainty rose-perfumed liquid dressing to give the hair its natural gloss and brightness, its natural wavy softness, its natural richness. Very easy to apply—simply sprinkle a little on your hair each time before brushing it. It contains no oil, and will not change the color of the hair nor darken gray hair.

To keep your hair and scalp dandruff-free and clean, use Harmony Shampoo. This pure liquid shampoo gives an instantaneous rich lather that immediately penetrates to every part of hair and scalp, insuring a quick and thorough cleansing. Washed off just as quickly, the entire operation takes only a few moments. Contains nothing that can harm the hair, leaves no harshness or stickiness—just a sweet-smelling cleanliness.

Both preparations come in odd-shaped very ornamental bottles, with sprinkler tops. Harmony Hair Beautifier, \$1.00. Harmony Shampoo, 50 cents. Both guaranteed to satisfy you in every way, or your money back. Sold in this community only at our store—The Bassano Tinsmithing and Plumbing Co., 3d Ave. Bassano, Alberta, which own the big Harmony laboratories, Toronto, where the celebrated Harmony Perfumes and Toilet Preparations and Toilet Tissues are made. J. H. Miller, the Druggist.

## MILLIONS FOR FOOD

Some Examples of How Taxes on Foodstuffs Oppress The Wage Earner

The incidence of taxation upon food and the manner in which it weighs with special severity upon the wage-earning classes is easily apparent from an examination of the Customs returns for last year. For instance during the year ending last March, Canada imported from the United States foodstuffs to the value of \$25,077,100, on which duties amounting to \$1,518,787.88 were collected. From Great Britain foodstuffs to the value of \$5,358,558 were imported, and even with the British preference the duties upon this amounted to \$1,075,480.88. France supplied us with food to the value of \$1,068,001, and before it could reach the tables of the Canadian consumer almost \$100,000 had to be paid into the Dominion treasury. In fact Canada imported foodstuffs for nearly fifty countries during the year, and every country brought in had its cost to the Canadian consumer increased from twenty to thirty-five per cent before he could eat it. Is it any wonder that the people of Canada, facing a hard winter, lack of employment and money stringency, are eager to buy their food in the cheapest market without any artificial inflation by tariff?

There was no mention of the Borden emergency of the Borden \$55,000,000 present to the Admiralty in the speech from the Throne. Even Mr. Borden has apparently realized that Canada has a financial emergency of its own under his administration, and that the real question is not how to give \$55,000,000 for British warships, to meet imaginary troubles, but how to keep \$55,000,000 in the country to cope with its present troubles.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS.  
The sale land of a family, or any male over 18 years of age, may be purchased in parcels of Dominion land in Manitoba, Saskatchewan, or Alberta. The applicant must appear in person at the Dominion Lands Agency or the Agency for the District, or by proxy may be made at the office of any local Agent of Dominion Lands. Each subsequent land purchase requires upon and cultivation of the land in each of three years. A homestead is required in every case, except where residence is in the district. In certain districts a homestead is not required, but a certain section of the land in each of three years must be cultivated. Price of land is \$10.00 per acre. The time for settlement is in each of three years from date of purchase. Any failure to settle the land in each of three years results in the land being forfeited to the Government. The land is sold in parcels of 40 acres, 80 acres, 160 acres, 320 acres, 640 acres, 1280 acres, 2560 acres, 5120 acres, 10240 acres, 20480 acres, 40960 acres, 81920 acres, 163840 acres, 327680 acres,
